DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-4, 14-17 and 22-23 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 14-17 and 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,211,833 to Shirkhanzadeh, JP 03203977 or WO 9532744.

Each of the references cited above disclose a titanium or titanium alloy implants that are treated with phosphoric acid to produce a calcium phosphate or hydroxyapatite coating on the implant. This coating is deemed to fulfill the requirements of the claims with regard to the “calcification layer formed on the base”. Each reference discloses the implantation of the hydroxyapatite-coated titanium implants into the body. The presence of the hydroxyapatite/calcium phosphate coating, per the Japanese reference, improve the interaction of the endogenous cells with the implant.

Therefore, the disclosure of the implanted hydroxyapatite-coated titanium structures in human tissue is deemed to anticipate the cited claims, because upon

implantation, cells would be expected to migrate to the coated structure and upon interaction with the structure, would secrete an extracellular matrix which would inherently act as described by applicant to combine with the titanium base through the hydroxyapatite.

Claims 1-4, 14-17 and 22-23 are rejected under 35 U.S.C. 102(a) as being anticipated by DE 19944970.

The DE reference discloses a titanium or titanium alloy implants that are treated with phosphoric acid to produce a calcium phosphate coating on the implant. This coating is deemed to fulfill the requirements of the claims with regard to the "calcification layer formed on the base". The coated structure is disclosed as an appropriate cell culture substrate or as an implant.

Therefore, the disclosure of the implanted calcium phosphate-coated titanium structures in human tissue is deemed to anticipate the cited claims, because upon implantation, cells would be expected to migrate to the coated structure and upon interaction with the structure, would secrete an extracellular matrix which would inherently act as described by applicant to combine with the titanium base through the calcium phosphate. Further, upon cell culture, the cells would secrete an extracellular matrix which would inherently act as described by applicant to combine with the titanium base through the calcium phosphate.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
